

Riva2 & Eclipse | Gas Fires

Riva2 750HL with Fluted Vermiculite lining and Victorian Corbel Mantel and Hearth in Limestone with matching slip sets

A Warm Welcome

Nothing creates an inviting atmosphere quite like a Gazco fire. The focal point of any home, they add warmth and character to a room or living space – with or without a chimney.

Whether you want an up-to-the-minute, contemporary look or have your heart set on a more traditional fireplace, the Riva2 and Eclipse fires offer stunning flame visuals and versatile styling options, instantly adding an eye-catching centrepiece to your interior.

Technical Information 73

Relax - it's a Gazco Fire...

When you choose Gazco, quality and innovative technology are assured. From traditional models to contemporary designs, Gazco is committed to creating the ultimate flame-effect gas and electric fires.

Our research and development laboratories are amongst the most advanced in the world, ensuring that the very latest innovations are incorporated into our appliances.

Gazco is an ISO9001 accredited company. Our rigorous quality control system ensures that all our appliances comply with British safety standards as well as stringent European regulations. All fires in this brochure are CE marked. This means they have been independently tested to exacting European standards for safety as well as both heating efficiency and emissions.

Warranty

Your Gazco Expert Retailer will provide you with a Two Year Warranty for your new gas fire. This can be extended to a Five Year Warranty by registering your fire with Gazco. Please note, these warranties exclude certain consumable parts. Fires purchased outside of Gazco's Expert Retailer Network will carry a standard 1 Year non-extendable Warranty. Full warranty terms and conditions are available to view at www.gazco.com.

Expert Retailer Network

We take great care to ensure that our fires are designed, tested and manufactured to the highest possible quality and safety standards.

We are equally careful to make certain they are sold and installed correctly so you can enjoy years of pleasure from your fire. Our products are only available from experienced, independent retailers who will be happy to show you a selection of models locally in their showrooms, often fully operational. These independent retailers will discuss your individual requirements both technical (such as sizing the heat output to your room and advising on your flue type) and design, and ensure that you select the most appropriate product for your home.

Our experienced retailers will also be able to advise on, or assist with, the installation process as well as help provide any after-sales support and servicing your appliance may require in the future.

Whilst we encourage our retailers to promote fireplace products and their outlets via the internet, we do not believe suitable levels of customer care and satisfaction can be obtained from purchasing the product only online and we would strongly recommend that you consider this when undertaking your research and making a purchasing decision. Furthermore, please be aware that we do not offer technical support (beyond our statutory responsibilities) to products bought via nationwide online sales, where this support would normally be offered by one of our qualified, independent retailers.

Riva2 Fires

Our prestigious range of Riva2 fires combines stylish aesthetics with the high levels of performance you would expect from Gazco. Choose from a selection of portrait and landscape fires along with a wide variety of styling options to create the perfect Riva2 for your home.

Riva2 500 & 750HL (pages 10 - 23)

Specifically proportioned to fit a standard 22" and 36" wide British fireplace, offering you greater opportunity to introduce a stunning gas fire into your home with complete ease of installation.

Riva2 530 & 670 (pages 24 - 41)

Offering you extensive and exciting options to help you create the perfect look for your home and taste, both the portrait 530 and the landscape 670 have an impressive heat output of up to 5.6kW, fully operated via a Programmable Thermostatic remote.

Riva2 800 & 1050 (pages 42 - 49)

These impressive fires have been developed with a new dual-burner engine that offers a greater operational range, allowing you to select the heat output and flame visual to really suit your mood. There are many styling options available, from our classical stone mantels to the more contemporary frameless hole-in-the-wall look Edge.

Riva2 Stone Mantels (pages 50 - 57)

A stunning collection of timeless stone mantels, each one crafted in your choice of Natural Limestone or Antique White Marble, the perfect complement to many of the Riva2 fires and the ideal way to add a more traditional fireplace setting into your home.

* ODS (Oxygen Depletion Sensor) - This Conventional Flue safety feature will shut off the gas supply to the burner in the event of a reduction to oxygen levels in the room.

Δ All Gazco Balanced Flue fires have relief vents in the firebox ensuring compliance with EN 613:2001 for delayed ignition safety standards.

◊ The Riva2 500, 800 & 1050 Balanced flue fires can be installed into a conventional chimney by using the optional Riva2 Renovation Kit.

Riva2 Styling Options

There are a wealth of frame choices available to perfectly complement your Riva2 fire, outlined on these pages and shown in detail throughout the brochure. Each one of these frames offers a unique styling possibility and is crafted from the very finest materials.

Whether your tastes lie with the contemporary or the traditional, you can find a Riva2 frame to suit your interior. Options include a stunning, frameless 'hole in the wall' look, sleek glass and steel finishes, striking colour options and a wealth of hand-crafted stone mantels; ensuring that whatever your style preference, there is a Riva2 fire for you.

Riva2 500 & 750HL

Thoughtfully designed to fit into standard 22" and 36" British fireplace openings, the Riva2 500 and the larger Riva2 750HL usher in a new era of gas fires. With their highly realistic log effect fuel beds complemented by a wide choice of striking frames, mantels and lining options, these outstanding fires can be perfectly tailored to your home's décor.

Riva2 500

Offering up to 4.8kW of high efficiency heat output, the Riva2 500 will provide cosy warmth for those cold winter evenings as well as the ambiance of a highly realistic log-effect fire with glowing ember bed. The Riva2 500 also comes with a Programmable Thermostatic remote to give you complete control over the fire from your sofa.

Riva2 750HL

The Riva2 750HL provides up to 7kW of heat, making it ideal for heating larger spaces efficiently, all fully controlled with the Programmable Thermostatic remote control. Designed to fit into a standard 36" chimney opening, the Riva2 750HL allows homeowners to make the most of their existing fireplace, featuring non-reflective glass for a flawless open-fire appearance and crystal clear view of the rolling flames complemented by a wide range of frame styling options, the 750HL ensures a designer statement in every setting.

Lining Options

To enhance your styling possibilities and ensure you can achieve a look that will best suit you and your home, Gazco has developed a range of lining options, each providing an entirely different aesthetic for the stunning log-effect fire. Opt for the glamorous Black Reeded lining, the classic Brick-effect, the natural Ledge-stone-effect, the depth-enhancing Black Glass or the light and contemporary Vermiculite which also includes an attractive fluting detail on 750HL models.

Frame Options (see pages 8 - 9)

Choose from the contemporary styling of the 'Edge' with its clean, frameless design for that 'hole in the wall' look or alternatively opt for one of Gazco's distinctive frames to extend your styling possibilities. Ranging from the shining Black Glass of the Icon XS, to the subtle curves of the Verve XS, each frame is designed to create a real presence in your home and to complement your own individual tastes.

Remote Control

Both the Riva2 500 & Riva2 750HL come with a Programmable Thermostatic remote control, sporting a number of impressive settings; you can set your fire to thermostatically maintain a specific room temperature of your choosing, or you can programme your fire to a daily or weekly timer schedule for the ultimate in ease and convenience.

Riva2 500 & 750HL Edge

Riva2 750HL Edge with Brick-effect lining

Riva2 500 Edge with Black Reeded lining

The frameless aesthetic of the Riva2 500 & 750HL Edge allows you to create a chic, minimalist look whilst simultaneously bringing focus to the beautiful flames of these highly efficient gas fires.

The simple, clean lines of a 'hole-in-the-wall' fire can be further enhanced by creating a feature wall using Gazco's carefully selected range of fireplace tile surround packages. This contemporary collection of porcelain and natural stone tiles are the perfect complement to the modern aesthetics of the Edge.

For a more traditional look, the Edge models can also be paired with one of Gazco's elegant classic stone mantels, see pages 50 - 57 for details.

Riva2 500 Ellingham

Riva2 500 Ledgestone-effect lining

Riva2 500 Ellingham with Black Reeded lining

Crafted from cast iron, the Ellingham front is a surround option designed for hearth mounted installations of the Riva2 500.

With cast detailing, the Ellingham adds a touch of grace and elegance to Gazco's range of smaller, but high efficiency, glass fronted Riva2 fires. Although classic in style, the Ellingham will sit equally at home in both modern and traditionally styled interiors, with a matt black finish to offset the highly realistic log effect and choice of either Brick-effect, Vermiculite, Black Reeded, Ledgestone-effect or Black Glass lining options.

Riva2 530 & 670

The Riva2 530 and Riva2 670 are contemporary gas fires that are available with a stunning collection of modern and traditional frames and lining options, enabling you to create the perfect look for your home.

*Riva2 670 Evoke Steel with Metallic Red front,
Graphite rear and Brick-effect lining*

High Efficiency Gas Fires

With their glass-fronted design, Riva2 530 and 670 fires not only offer exceptional design, but also outstanding efficiencies of up to 82%. This high thermal efficiency ensures that over 5kW of comforting heat is delivered into your living space, creating a wonderful warming ambiance.

Framing Options (see pages 8 - 9)

There is an extensive choice of frames available for the Riva2 530 and 670 fires and several come with a number of additional colour finishes to create your own individual look. Choose from the designer curves of the 3D Verve and Verve XS frames, the Evoke Glass or Evoke Steel with their stunning layered composition and wide range of styling possibilities, the subtle detailing of the sophisticated Designio2 Glass and Designio2 Steel or the Neo-Georgian inspired Ellingham with its high-quality cast iron details.

Lining Options

To create a truly bespoke look that is just right for you, there is a choice of four stylish linings, each designed to offer a different look for the outstandingly realistic log-effect fire. Choose from the, chic Vermiculite, smart Black Reeded, classic Brick-effect or the highly reflective Black Glass lining, all of which form a unique complement to the attractive Riva2 530 and 670 fires.

Vermiculite Lining

Black Reeded Lining

Brick-effect Lining

Black Glass Lining

Riva2 530 Designio2 Glass with Black Reeded lining, shown with Malmo mantel available from Stovax.

Simple Installation

The Riva2 530 and 670 are both compatible with our optional linerless flue kit. At just 0.5 metres long, this short piece of flexible, stainless steel flue pipe and debris deflector has been specifically designed to be slotted into your masonry chimney. This eliminates the need for the chimney to be fully lined and any associated labour, facilitating a simpler and more cost effective installation.

Remote Control

Supplied as standard with your Riva2 530 or 670 fire, this multi-function Programmable Thermostatic remote enables ignition, extinguish and flame control alongside advanced thermostatic and timer programming functions. Whether you decide to set a daily or weekly programme or simply prefer to maintain a desired room temperature, your gas fire can provide a warming welcome, every time you return home.

Riva2 530 & 670 Designio2 Glass

Riva2 670 Designio2 Glass with Black Reeded lining

Riva2 530 Designio2 Glass with Vermiculite lining

The Designio2 Glass frame has smart, reflective black surfaces with subtle detailing and clean lines. It is a sophisticated front for both the portrait dimensions of the Riva2 530 and the landscape shape of the Riva2 670 and its simple, chic design will complement a wide array of interiors.

Combined with your choice of the four linings available in Brick-effect, Vermiculite, Black Glass or Black Reeded, the Designio2 makes for a glamorous addition to your home.

The Riva2 530 and 670 are both compatible with our linerless flue kit for a simplified installation. Please see page 75 for further information. This stunning fire can also be hearth-mounted for installation into a traditional fireplace opening.

Riva2 670 Evoke Glass in Black Glass with Metallic Bronze rear and Black Reeded lining

Riva2 530 Evoke Glass in White Glass with Graphite rear and Brick-effect lining

The Evoke Glass is an eye-catching frame with two separate layers of stunning reflective glass and sophisticated steel. Choose from a luxurious black or white glass front to complement the bevelled rear steel section in Graphite or optional vibrant Metallic Red, Metallic Bronze and Ivory finishes.

Four chic lining options, add numerous styling possibilities to the Riva2 530 and 670, enabling you to create a truly bespoke fire for your home.

Riva2 670 Evoke Steel with Graphite front and rear with Black Glass lining

Riva2 530 & 670 Evoke Steel

Riva2 670 Evoke Steel with Ivory front, Graphite rear and Vermiculite lining

Riva2 530 Evoke Steel with Metallic Red front, Graphite rear and Black Reeded lining

The Evoke Steel is a stunning, two-part design that blends expertly into modern interiors. The front face of this frame comes in a stylish Graphite finish with the option for customisation in one of three exciting additional colour choices. The attractive bevelled rear is left in Graphite to perfectly complement the standard finish on the front or form a contrasting border to any of the bold colour choices. With a Programmable Thermostatic remote control and high efficiency heat output, the Riva2 Evoke steel is as impacting in its functionality as it is in its designer aesthetics.

Riva2 800 & 1050

The Riva2 800 & 1050 take large format gas fires to a new level with high efficiency heating and striking designer aesthetics. Available with a choice of styling options, the Riva2 800 is also compatible with Gazco's collection of six beautifully crafted, classic stone mantels.

*Riva2 1050 Icon XS with Vermiculite lining.
Shown with Zelo Slimline Grey Fire Surround Tiles.*

Stunning Flame Visuals...

An enticing focal point for your home, both the Riva2 800 and 1050 offer incredible flame visuals that deliver all the ambiance of a solid fuel fire. At the cutting-edge of fire design, the advanced dual burner system gives you the option to choose between using one or two burners, allowing you to create your perfect atmosphere and heat output. Both models feature a glowing ember fuel bed and non-reflective glass for a flawless, open fire aesthetic.

Convected heat enters the room through high level vents which are incorporated into your installation, providing cosy ambient heating throughout your living space.

Frame Options (see pages 8 - 9)

The Riva2 800 & 1050 come with a number of styling and frame options designed to enhance the impressive dimensions of these fires. Choose from the minimalist styling of the frameless Edge, or frames such as the Icon XS with a highly reflective Black Glass finish.

For hearth mounted installations, the graceful proportions of the Sorrento stone surround enables you to recreate a style reminiscent of a traditional fireplace whilst still maintaining a thoroughly contemporary look for your living space. Choose from in either Graphite Granite or Natural Limestone.

For an altogether more traditional look, pair your Riva2 800 with one of six timeless and elegant stone mantels, expertly blending classical fireplace styling with the very latest in heating design and technology.

Lining Options

To further tailor your Riva2 800 or 1050 to your own setting, there is a choice of two stylish linings, each designed to offer a completely different look. Choose from the timeless Black Reeded lining for a more classic look or opt for the Vermiculite lining which enhances the fire's glow.

Black Reeded Lining

Vermiculite Lining

Riva2 800 Sorrento in Natural Limestone with Black Reeded lining

Remote Control

Riva2 800 & 1050 fires come complete with a state-of-the-art Programmable Thermostatic remote control as standard. This allows remote operation of everything from ignition to extinguish as well as incorporating the benefits of a programmable timer and thermostat. Both fires also come complete with a flat Touch Control panel that can be discreetly wall mounted up to 2.5 metres away from the fire, allowing you to ignite, extinguish and control the flame height manually if you choose.

Programmable Thermostatic Remote and Flat Touch Control Panel

Riva2 800 & 1050 Edge

Riva2 800 Edge with Black Reeded lining. Shown with Gazco's Cape Town Grey Matt fire surround tiles

Riva2 800 Edge with Vermiculite lining

Developed for those who want the visual impact and heat of a blazing log fire with all the ease of gas, the Riva2 800 & 1050 Edge offers high efficiency in a frameless design. With advanced dual burners to give you complete control, you can create the perfect flame visuals to suit your mood.

The frameless look allows you to create a more minimalist décor, to which tiles or wall colours and finishes can be added to maximise the overall impression of depth and space. Gazco offers a range of fireplace tile surround packages to complement the Riva2 Edge fires.

Although the Riva2 800 & 1050 are available as balanced flue fires, they can be installed into a conventional chimney by using the optional Riva2 renovation kit. Details of this can be found on page 79.

Riva2 1050 Icon XS with Black Reeded lining.

Riva2 1050 Icon XS with Vermiculite lining.

The Icon XS is a truly awe-inspiring frame and the perfect complement to the large format Riva2 800 & 1050 fires. Iconic in both name and nature, this luxuriant frame is designed to make an impact. The resplendent, highly reflective Black Glass and clean geometric lines offers unrivalled flair and elegance blending seamlessly with your own decorative tastes.

The Riva2 800 & 1050 have a heat output of up to 7.98kW. The crystal clear non-reflective glass window offers an uninterrupted view of the stunningly realistic logs with innovative glowing ember effect fuel bed, whilst the Programmable Thermostatic remote control provides the finishing touch - perfect comfort at just the touch of a button.

Riva2 Stone Mantels

*Riva2 750HL Edge with Brick-effect lining and
Claremont Mantel in Limestone with matching slip sets*

Traditional Style with a Modern Slant...

Gazco's collection of six high quality stone mantels and optional hearths are available in a choice of either Limestone or Antique White Marble, each piece truly unique by virtue of the naturally occurring veining, subtle tonal differences and indeed even small fossils that may be found in the limestone. Each mantel is a beautiful and natural complement to many of the high efficiency fires shown in this brochure and the perfect way to create a grand finish and a timeless fireplace in your home.

Eclipse Fires

The Eclipse 100 offers state-of-the-art features, beautiful design and cutting edge technology which combine to create the ultimate ambiance in your home. With an impressive heat output complemented by a choice of frames and lining options, this high efficiency fire will instantly add contemporary elegance to any home.

Fabulous Frames & Flames

The very latest fire to adorn the Gazco range, the Eclipse 100 brings with it a series of new technological advancements that combine to create a high efficiency fire with truly awe-inspiring flame visuals. The generous firebox offers a highly realistic flame picture that flows through a hand-painted, ultra realistic log-effect fuel bed accentuated by mesmerising glowing embers. Offering a crystal clear view of the stunning flames, the Eclipse also features non-reflective glass for a flawless, open-fire aesthetic. Presented in a choice of three sophisticated frames as well as a 'hole-in-the-wall' frameless Edge design, there is a contemporary style choice to suit all interiors.

Convenient Control

The Eclipse 100 also comes complete with a Programmable Thermostatic remote control as standard. Giving you full control over your fire, the handset operates everything from ignition to extinguish as well as integrated a programmable timer, temperature control and Gazco's convection fan air system from the touch of a button. The advanced dual-burner system also allows you to set your perfect atmosphere by selecting to use one or two burners, giving you total control over flame height and heat output.

Luxury Linings

Further extending its appeal and style options, the Eclipse 100 has two attractive lining choices - classic Black Reeded and smart Ledgestone-effect. The Black Reeded lining offers a striking contrast to the flickering flame, whilst the Ledgestone-effect, with its textured profile finish, brings a brighter, natural alternative that adds interest even when the fire is off. Each lining enhances the overall setting of your new Eclipse fire whilst providing their own unique and distinctive finish.

Eclipse Edge

Eclipse 100 Edge with Ledgestone-effect Lining

Installed as a frameless 'Edge', the Eclipse 100 creates a breathtaking hole-in-the-wall focal point that lets the enticing flame picture take centre stage - perfect for any interior. With the tall, eager flames dancing through the wonderfully realistic log-effect fuel bed, the Eclipse 100 Edge is a statement in itself.

Eclipse 100 Icon XS, Balanced Flue 	85%	9.35kW	1386 x 754 x 26

^Δ Dimensions given are those overall visible upon installation. Efficiency figures are based upon the maximum heat output achieved in the options available. For more detailed technical information, including firebox dimensions and installation requirements, please see page 73.

Gazco Studio Fires

Studio 2 Conventional Flue, Profil in Anthracite with Log-effect fuel bed and Black Glass lining

Studio 22 Balanced Flue Profil in Anthracite

Studio 1 Freestanding Conventional Flue with Black front and matching bench, pebble and stone fuel bed and black reeded lining

Gazco Studio fires combine stunning aesthetics, heating performance and versatile installation options to create a stylish, contemporary gas fire range suitable for a range of homes with or without a chimney.

Available as either Open or Glass Fronted fires, inset or freestanding as well as conventional or balanced flue models, the Studio range's striking flame visuals can be customised with the wealth of styling options offered.

Studio fires have a choice of fuel effects and lining options, depending on the model, which enhance the flames and let you customise your fire to your tastes. Fuel bed options include highly realistic log-effect for traditional wood fire ambience or ultra-contemporary white stones and glass beads, for a minimalist design statement. Providing a backdrop to the flames, there is also a choice of linings for many fires in the Studio range, including the luxurious, depth-enhancing Black Glass that mirrors the flames on each side.

As well as lining and fuel-effect choices, Inset Studio fires have a variety of frame options available, including a number of different styles in steel or glass, as well as various colours and finishes. These stunning frame options have all been designed specifically to complement this contemporary fire range and offer you a spectrum of different styling possibilities.

Further information about this exciting range can be found in a separate, dedicated brochure which can be requested from your local retailer or viewed online at www.gazco.com.

To view the Gazco Studio Fires brochure, simply scan this QR code, visit www.gazco.com or speak to your local Gazco retailer.

Gazco Electric Fires

Studio Electric 22 Verve

Radiance 150W Glass in Black Glass

Riva2 Electric 70 with Victorian Corbel Mantel in Limestone

In addition to the wide selection of gas fires shown in this brochure, Gazco also offers an extensive array of highly realistic, stylish electric fires which are covered in separate dedicated brochures.

Offered in a wealth of styling options, these fires feature the very latest technology with realistic flames for a versatile and stunning focal point in any home – all without the need for a chimney!

Fires such as the latest Gazco Radiance combine stunning LED flame effects with mood enhancing lighting features, effortlessly setting the atmosphere thanks to their stylish Chromalight™ backlighting feature*.

Available in hang-on-the-wall, hearth mounted or frameless inset options, as well as a wide selection of contemporary frames and matching classic stone mantels; Gazco's cutting edge electric range has it all.

**Wall mounted Radiance fires only.*

Whether you want to achieve a modern contemporary look or a more classic, traditional interior, the Gazco Electric Fires and Stoves brochure has the perfect solution whatever your style or budget.

To view the Gazco Electric Fires & Stoves brochures, simply scan this QR code, visit **www.gazco.com** or speak to your local Gazco retailer.

Radiance Inset 135R Edge

Your Home and Flue Requirements...

Conventional Flue

Conventional flue systems are for Gazco's Open Fronted and some Glass Fronted gas fires. They are easily recognisable as either a conventional brick or stone chimney, or as a pre-fabricated chimney system. Should your home have neither at present, it is usually possible to have a pre-fabricated system installed in your home if required.

Brick/Stone Chimney

(Class 1)

The chimney stack rises well above the roofline and is topped by a traditional chimney pot or gas terminal. This type of chimney relies on the natural circulation of heated air to expel the products of combustion up your chimney.

Pre-fabricated Flues

(Class 1 & 2)

You will see a metal flue cowl on your roof. Some are all metal whilst others may terminate through a short rectangular pot (but without a chimney stack). These flues create the same circulation of heated air as a brick or stone chimney.

Balanced Flue

Balanced flues work in conjunction with Gazco's Glass Fronted gas fires only. The appliance is completely sealed from the room into which it is installed (so there are no draughts and heating efficiency is increased) and a twin-wall pipe vents directly to an outside wall.

Balanced Flue

(No chimney required)

Air for combustion is drawn in through the outer pipe whilst the inner pipe removes the combustion gases to the exterior of the property. Depending on the fire selected, the twin-walled pipe may exit horizontally through an external wall or vertically through the roof. Gazco offers a comprehensive range of balanced flue system components. Please refer to our dedicated Concentric Flue System brochure which can be requested from your retailer or viewed online at www.gazco.com.

No Air Vent Required (UK)

All fires shown with this symbol have the advantage of not normally requiring an air vent*. Please discuss this in full with your local retailer.

*Requirements in the Republic of Ireland are different.

Technical Information

The following pages provide the dimensional, heat input/output, efficiency and product code information you will need to choose your new Gazco fire. For more detailed specifications, please consult your Gazco retailer. Complete installation instructions may be downloaded from www.gazco.com.

8509	Balanced Flue Kit - up and out (1x200mm straight, 1x500mm straight, 1 x 500mm terminal length, 1x90° bend)*
999-201	Horizontal Exit terminal guard (required for below 2m)
8736	Linerless kit for Riva2 530 and 670
999-620	Sequential system mains adaptor

*Additional flue pipe lengths and bends are available to extend the above kits

For more Balanced Flue information and options please refer to our Concentric Flue System brochure which can be viewed or downloaded online at www.gazco.com

ADDITIONAL INFORMATION FOR RIVA 530 AND RIVA 670

NOTE: New 530 and 670 conventional flue connection system means easier installation. No access to flue connector required during installation.

†A marble slip with a minimum width of 150mm is recommended around ALL installations. No combustible material, including wallpaper, should be less than 150mm from the appliance.

*When installing below 150mm from the floor it is recommended that a 12mm thick non-combustible hearth is provided, extending 300mm in front and 150mm each side of the fire.

NOTE: Access to flue will be required during installation.

Important Information

Technical Specifications

All specifications given in this brochure are approximate. Actual specifications for each individual product will vary according to model. Your Gazco retailer will be pleased to provide any further information you require. Alternatively you may view or download specification sheets from www.gazco.com

Installation and Safety

Gazco gas fires must be fitted by a qualified gas installer (Gas Safe registered in the United Kingdom or Bord Gáis registered in the Republic of Ireland) who should also verify the proposed site conditions are fully suitable for the product selected. Complete installation instructions for many models can be obtained prior to purchase by viewing or downloading them from www.gazco.com. Please note that all parts of these fires, particularly the glass panel in the door, become extremely hot during operation and can result in serious injury and burns if touched. It is therefore recommended that a fireguard complying with BS 8423:2002 is used in the presence of young children, the elderly or infirm.

Colours/Flame pictures

Owing to variations in studio lighting and printing inks, the finishes/colours of fires illustrated in this brochure may differ slightly from actual models. Before purchasing, please ask your retailer to show you finish/colour samples. Whilst all the flame pictures shown in this brochure are of actual fires, flame pictures may vary depending on the installation, flue conditions and geographical/surrounding features that may effect the efficiency of the flue.

Care and maintenance

Traditional materials, such as polished steel and brass, tarnish on contact with air, especially when also exposed to heat. To help minimise this effect, we recommend fires receive regular treatment with suitable proprietary cleaners. Additionally, please remember that gas fires will require servicing annually by a qualified gas installer Gas Safe registered in the United Kingdom or Bord Gáis registered in the Republic of Ireland).

Warranty and Product Improvement

Your Gazco Expert Retailer will provide you with a Two Year Warranty for your new gas fire. This can be extended to a Five Year Warranty provided your fire has been registered with Gazco. The second and subsequent years are dependant on the appliance being serviced 12 months after installation and annually thereafter and exclude certain consumable parts. Fires purchased outside of Gazco's Expert Retailer Network will carry a standard 1 Year Non-Extendable Warranty. Full warranty terms and conditions are available to view at www.gazco.com.

Gazco pursue a policy of continuous product improvement, therefore, whilst our products are correct at the time of the photography, we reserve the right to make alterations and amendments. Exact product details should be discussed with your retailer at the time of purchase.

Air Ventilation for Gas Fires

To comply with gas appliance installation regulations, all Studio 2 and 3 Open Fronted fires and all Glass Fronted Studio 2 fires with a conventional flue require additional ventilation into your room. For further information, please consult either your Gazco retailer or the Gazco Technical Information on our website www.gazco.com to confirm the ventilation required. All other fires featured in this brochure do not require additional ventilation.
