STOVAX
Fire Your Imagination

Introducing the latest addition to the award winning Elise range

The future of fire engineering, the Elise collection offers superb flame visuals and high efficiency heating. Now offered in a stunning contemporary stove format, Freestanding Elise models join the pioneering Elise cassette fires, presenting a versatile, eco-friendly heating solution that will add a dramatic centrepiece to any home.

Five Year Warranty

When you choose an Elise, quality and technology are assured. Accordingly, when you purchase your new fire or stove from a Stovax Expert Retailer they will provide you with a Two Year Warranty. This can then be extended to a Five Year Warranty provided your Elise is registered with Stovax. Products purchased outside Stovax's Expert Retailer Network will carry a standard One Year Warranty. See www.stovax.com for details.

Freestanding Elise Glass 540 multi-fuel with Gloss Black Flue Pipe

Freestanding Elise Stoves

Freestanding Elise stoves feature the range's signature tapered firebox and precision airflow systems, ensuring combustion air is delivered to key areas of the firebox for a complete, ultra-green burn. Reaching thermal efficiency levels as high as 83% whilst reducing smoke emissions, Freestanding models offer some of the highest heating performances possible, without sacrificing the magnificent flame visuals.

Engineered to exacting tolerances, Freestanding Elise stoves burn so cleanly they exceed future 2022 Ecodesign standards, with some models ensuring that substances present in smoke emissions such as carbon monoxide (CO), nitrogen oxide (NOx), organic gaseous compounds (OGCs) and particulates (PMs) are minimised to as little as a fifth of proposed levels*.

Elise key design features

- 1 Unique plenum chambers manage exactly calibrated airflows
- 2 Air jets deliver precision airflow for the cleanest possible combustion
- 3 Powerful Airwash ensures a clear view of flames
- 4 Scalloped, high density thermal brick liner system
- 5 Airtight door with twin latch dampened mechanism for easy closing
- 6 Easy to use air controls for instant adjustment of flame visual and heat
- 7 Convected and radiant heat delivery
- 8 External riddling grate (multi-fuel models)
- 9 Removable Ashpan (multi-fuel models)
- 10 Optional dedicated external air supply
- 11 Optional plinth
- 12 Top or rear flue exit

Dedicated external air supply

Elise fires can be installed with an optional dedicated external air supply, ensuring they draw combustion oxygen from the outside of your home instead of the room they are situated. This potentially negates the need for an additional air vent and minimises internal drafts.**

* For more information, see the main Elise fires brochure which can be requested from your local retailer or viewed online at: www.stovax.com

** See page 10 for further details.

Freestanding Elise 540

Providing a 5kW heat output at an exceptional 83% thermal efficiency, the Freestanding 540 can easily heat standard sized rooms and living spaces. This state of the art, contemporary styled stove can be selected as a woodburning or multi-fuel model with either a Glass or Steel front.

KEY FEATURES

- > **Nominal Heat Output:** 5kW (3-7kW)
 - > **Maximum Log Length:** 250mm
 - > **Dimensions:** W: 543mm H: 560mm D: 395mm
 - > **High efficiency:** up to 83%
-
- > Engineered to meet Ecodesign low emission standards and produce minimal flue gases
 - > Woodburning and multi-fuel models
 - > Cleanburn and Airwash systems
 - > Smoke Control Approved as standard†
 - > Optional Dedicated External Air Kit
 - > Glass or Steel fronted models available
 - > Plinth base option
 - > Stove bench compatible (page 10)
 - > Top or rear flue exit

† Subject to official listing

† Flame Viewing Area. The raised log bar on multi-fuel models reduces the height of the flame viewing area by 25mm.

✓ All Elise stoves with this symbol have been approved for use in Smoke Control Areas as standard and do not require any additional Smoke Control Kit (subject to official listing).

A HETAS approved installer should undertake a site survey prior to purchase and must install any Elise Fire. You may view/download complete installation instructions at our website - www.stovax.com. These diagrams cover some of the basic requirements. All fires and stoves should be installed by a competent person to the requirement of Building Regulations (Document J) and include the fitting of adequate ventilation to ensure safe use. Usually older buildings do not need any additional ventilation for appliances up to 5kW, but modern houses will need additional ventilation in all cases. All models can be fitted with an optional dedicated external air supply, offering a discreet and draught reducing solution to standard room venting. It is important to understand and comply with any additional commissioning requirements when this kit is fitted. The diagrams and dimensions on these pages cover some of the basic requirements and are for initial information purposes only.

Please note that all parts of these stoves, particularly the glass panel in the door become extremely hot during operation and can result in serious injury and burns if touched. It is therefore recommended that a fireguard complying with BS:8423:2002 is used in the presence of young children, the elderly or infirm.

Elise cassette fire range

In addition to the Freestanding models, the Elise family also includes a range of Steel and Glass fronted cassette fires which are featured in a separate Elise brochure. Within, you will also find detailed information regarding the Elise range's compliancy with future Ecodesign efficiency and emission standards, one of the many reasons that makes this range the gold winner of 'Best Heating Product' in the highly regarded House Beautiful awards.
